

# ENDO GATOR™

Hybrid Tubing

Procedure

a STERIS company

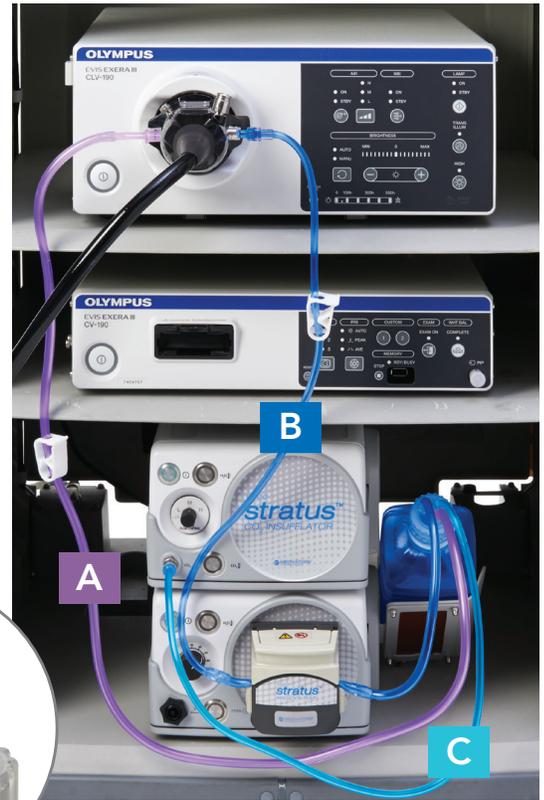

## The ENDOGATOR™ Hybrid Tubing offers a infection prevention solution by combining the ENDO SMARTCAP™ and ENDOGATOR™ Tubing into one system.

The Hybrid delivers humidified CO<sub>2</sub> which can help prevent the mucosa from drying out during procedures.

- Can be used with either room air or CO<sub>2</sub> for insufflation
- Fits any sterile water bottle
- 24-hour disposable tubing
- Eliminates manual cleaning and reprocessing of reusable water bottle and tubing
- Promotes patient safety and supports infection control guidelines.

For ENDOGATOR™ Hybrid Tubing with FUJIFILM™ Scopes, incorporate a connector on the irrigation line, which helps navigate the anatomy of the FUJIFILM™ Scope.

ENDOGATOR™ Hybrid Tubing has a soft design that prevents scope port damage.

Tubing is colored for reference only

## AS EASY AS

- |   |   |                          |
